## Work Experience

### **Junior Web Developer (e-commerce): Russell & Bromley, London May 2021 – present**

Working extensively with HTML, CSS, JavaScript, and Knockout.JS to maintain and code new components and content for the e-commerce website. Create responsive, re-usable custom widgets and collaborate on best practises for UX, Web Design and Development, SEO, performance and optimisation of widgets and assets. Collaborate with the external Oracle OCX development team to maintain good quality clean code, version control and work flow using Git and internal scripts. Undertake collaborative projects within the Development team, and the wider team. Built online booking form for internal use within Stores, and on the website. Raise and manage tickets through Azure Dev-ops. Working analytically to create the most efficient and effective solution to each problem. Using excellent communication skills to describe technical processes to non-technical colleagues, keeping everyone in the loop. Making presentations at our weekly team meeting where each team presents projects, tasks or general information specific to their team for the wider office to engage in.

### **Web Developer (Contract): Lara Oz Therapies, London 2020 – May 2021**

Created a website for Lara Oz Therapies, London from concept to production using Wordpress, ACF and Contact Form 7. The client is evolving their business to focus on online presence and group classes. Build fully custom theme on Wordpress which is cross-browser compatible and responsive. Optimised assets (logo, images). Contact form with validation and ReCAPTCHA integration. Fully custom Google Maps integration including all locations of services. Brand guardianship: maintaining brand consistency and feel throughout the site. Assets and content management and optimisation to give client autonomy over updates and edits. Providing support and problem solving where needed. Communicating at key stages and working collaboratively to integrate clients ideas, and inspire her creative process with my own knowledge and experiences.

### **Freelance Web Developer: London 2020 – present**

Using HTML, CSS, JavaScript, Wordpress and PHP to produce stylish and functional websites. Working with APIs to integrate with required services. Understanding the needs of the client and the project. Communicating ideas in an understandable way. Designing with a view to User Experience. Working to deadlines. Keeping up with industry standards and trends. Continually learning and developing skills and new ways of working.
